

## CAUSE AND EFFECT

Cause and effect refers to the relationship between two events.

**CAUSE** is something that makes something else to happen...an **EFFECT**.

A **cause** is **WHY** something happens and an **effect** is **WHAT** happened as a result of that cause.

There may be more than one cause or effect in a situation.

*Example:*

**Cause:** The grass grew long.

**Effect:** My Dad cut the grass.

### Fact vs.

Please login or register to download the printable version of this study guide.

A **fact** is in

[www.newpathlearning.com](http://www.newpathlearning.com)

A fact is a certainty. A fact does not change from person to person.

An **opinion** is a personal belief or idea.

An opinion is not a certainty for all people because all people do not have the same beliefs.

*Example:*

**Fact:** There are four seasons: winter, spring, summer, and fall.

**Opinion:** Fall is the best season.
