

What are Shapes?

- Shapes are everywhere. They are at school, at home, inside, and outside.
- A shape is the form something takes.
- Some shapes can stack.
- One shape can roll.
- For shapes with sides and corners, the number of sides is equal to the number of corners.

How to figure out shapes:

- A **square** is a shape with four equal sides and four corners. A square can stack.

- A **rectangle** is a shape with four sides. There are two long sides and two short sides.

- A **triangle** is a shape with three sides and three corners. A triangle cannot stack.

- A **diamond** has four sides. It is a square turned up on a corner.

A **circle** does not have any sides. It is round. A circle can roll.
