

## MONEY TO \$5

### What Is Money?

- Money is what we use to make purchases for our needs and wants.
- United States money consists of the following metal coins and paper bills:

penny = 1¢ or \$0.01

### How to count money:

- When counting money, you are simply adding the values of the coins together.
- When counting money, it is best to start with the highest value coin or paper bill you have, then count on.

For example:

If you have the following coins, it is best to start by counting the quarter first. Then count on.

The total amount of these coins is 64¢ or \$0.64.

- Now it is time to try another example. This time start with a one dollar bill!

\$1.00

\$1.10 \$1.20 \$1.25 \$1.26

The total amount of money here is \$1.26.

### Try This!

- Count the following sets of money and write the amount on the line.
