20 =
30 = **Thirty**
40 = **Forty**
50 = **Fifty**
60 = **Sixty**
70 = **Seventy**
80 = **Eighty**
90 = **Ninety**

- If the ones place has more than zero, the word is made by using the ten's place word, a hyphen, and then the ones place word.

58 is **fifty-eight**
82 is **eighty-two**
75 is **seventy-five**

- Numbers, such as **2,754**, have four digits. Each digit is a different **place value**.

- The **first digit** is called the **thousands' place**. It tells you how many sets of one thousand are in the number. The number 2,754 has two thousands.
- The second digit is called the **hundreds' place**. It tells you how many sets of one hundred are in the number. The number 2,754 has seven hundreds.

- The third digit is the **tens' place**. It tells you that there are 5 tens in this number.

- The last or right digit is the **ones' place**. The 4 is in the one's place in 2,784.

How to determine number words:

- The nu~~mber~~

  2 thou

- Number

  o standard form: 346
