

SEASONS

A **season** is a different time of year.

There are four seasons: winter, spring, summer, and fall.

Please login or register to download the printable version of this study guide.

The four seasons are:

Winter comes first.

Spring comes next.

Summer is third.

Fall is the fourth season.

The seasons happen in a pattern.

Seasons bring different types of weather.

Winter

Winter is the coldest season.

In many places, it snows during the winter.

Winter brings cold temperatures in many places.

SPRING

Please login or register to download the printable version of this study guide.

www.newpathlearning.com

Spring is the time when plants grow.

New leaves grow on trees during the spring too.

SUMMER

Summer is the warmest season.

Summer brings hot temperatures in many places.

Many plants
